

1442

Côteaux d'Aix-en-Provence

total acidity **5.17 g/L** alcohol **13%**

ph **3.26** volume **750ml**

ROSÉ

50 % Grenache, 20 % Cinsault,
15 % Mourvèdre, 15 % Cabernet Sauvignon

TASTING NOTES

This distinct, copper-pink hued wine is refined yet generous, and enjoyable year-round. You can taste the red berry fruit, endless flower fields, lavender, olive trees and chaparral of Provence in every bottle of 1442 rosé - a luscious, evocative, timeless style of wine.

2023

FOOD PAIRINGS

Seared tuna, ratatouille, cured ham.

91 points James Suckling

DOMAINE

In 1442, Guillaume de Damian, an Avignon resident, bought the lordship of Vernègues where the vines are located today. The history of the vineyard as we know it now began at this time. Successive families contributed to the reputation of the vineyard by allowing the vines to express themselves in order to reveal the full potential of their fruit.

TERROIR

The vineyard parcels are located in one of the best terroirs of the appellation, between 200 and 300 meters above sea level. The forests and valleys of the region intertwine in as many climates and soils particularly conducive to the cultivation of vines. The vines are mainly planted on sun-drenched, clay-limestone hillsides, and in the hollows of cool, shady valleys.

WINEMAKING

There are many ways to approach rosé production - bleeding off a tank of fermenting red after the juice has leached color; the addition of red wine to white, etc, but there is only one method that is associated with Provence's very best pinks - direct to press processing. This means that the grapes are immediately loaded into the press after being harvested, in the same way as classic white wine production. Before pressure is applied, however, the skins are allowed to macerate in the juice that has been collected at the bottom of the press pan, leaching some of their color into the juice. The press cycle is then completed, and the wine fermented to dryness in temperature-controlled stainless steel.
